

For Immediate Release:

## **Slaughter Company (SCI) announces the release of their all-new 290 Series of Hipot Testers**

**Lake Forest, Illinois, December 2015** – SCI (Slaughter Company Inc.), the leader in making safety simple, announced the addition of the 290 Series of Hipot Testers to their product line. An improved interface that eliminates confusing menus and redundant button pushes allows manufacturers to set-up and run production Hipot tests in a matter of seconds. The 290 series also provides common sense security settings that make it easy to set the permission levels. With a rugged and reliable design, the 290 Series is well suited for production line applications. Optional USB interface provides a simple way for manufactures to automate their production line.

The 290 Series features the following models:

- 294** 6 kV DC Hipot Tester
- 295** 5 kV AC Hipot Tester
- 296** 5 kV AC & 6 kV DC Hipot Tester
- 297** 5 KV AC & 6 kV DC Hipot Tester with Insulation Resistance Tester
- 298** 500VA AC Hipot Tester

The 290 Series will be available in early January, 2016.
